We would like to thank you for your trust in ITI Mutual Fund.

We encourage you to connect with us on our digital platforms.

We request you to submit transactions / requests by using various other modes i.e. AMC website (www.itiamc.com) / RTA website http://mfs.kfintech.com/mfs//RTA Mobile app/ MFU website / MFU mobile application or connect with your financial advisor.

If you have any further queries, our phone line is available to assist you between 9:00 a.m. to 6 p.m. from Monday to Saturday on 18002669603 (Toll free). Alternatively, you can also e-mail us at mfassist@itiorg.com. We would appreciate your patience while we work on your query and ready to provide satisfactory responses.

Thanking you, and assuring you of our best services always.

#### **Glossary**

- Average Maturity: Weighted average maturity of the securities in scheme.
- Macaulay Duration (Duration): Macaulay Duration (Duration) measures the price volatility of fixed income securities. It is often used in the comparison of interest rate risk between securities with different coupons and different maturities. It is defined as the weighted average time to cash flows of a bond where the weights are nothing but the present value of the cash flows themselves. It is expressed in years. The duration of a fixed income security is always shorter than its term to maturity, except in the case of zero-coupon securities where they are the same.
- Growth and Cumulative option: Growth and Cumulative words are used alternatively.
- Risk ratio data: There are few stocks which are having abnormal price to earnings multiple, because of the aberration (Covid-19) in the financial results (of the base year). We believe the price to book multiple is a better indicator of the business valuation especially in this kind of abnormal situations. Investors should ideally normalise these valuation multiples to have a better idea of the portfolio.
- Portfolio Turnover Ratio: Portfolio Turnover Ratio is the percentage of a fund's
  holdings that have changed in a given period. This ratio measures the fund's trading
  activity, which is computed by taking the lesser of purchases or sales and dividing it by
  average monthly net assets.
- Tracking Error: Tracking error indicates how closely the portfolio return is tracking
  the benchmark index return. It measures the deviation between portfolio return and
  benchmark index return. A lower tracking error indicates portfolio is closely tracking
  benchmark index and higher tracking error indicates higher deviation of portfolio
  returns from benchmark index returns.
- Risk Free Return: The theoretical rate of return of an investment with safest (zero risk) investment in a country.
- IDCW IDCW stands for 'Income Distribution cum Capital Withdrawal option'. The
  amounts can be distributed out of investors' capital (Equalization Reserve), which is
  part of the sale price that represents realized gains, as may be declared by the
  Trustees at its discretion from time to time (subject to the availability of distributable
  surplus as calculated in accordance with the Regulations).
- Portfolio Yield (Yield To Maturity): Weighted average yield of the securities in a scheme portfolio.
- Total Expense Ratio (TER): Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.

#### How to read factsheet

- Fund Manager: An employee of the asset management company such as a mutual fund
  or life insurer, who manages investments of the scheme. He is usually part of a larger
  team of fund managers and research analysts.
- Application Amount for Fresh Subscription: This is the minimum investment amount for a new investor in a mutual fund scheme.
- Minimum Additional Amount: This is the minimum investment amount for an existing investor in a mutual fund scheme.
- SIP: SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for a SIP that invests Rs. 500 on every 15th of a month in an equity fund for a period of three years.
- NAV: The NAV or the net asset value is the total asset value per unit of the mutual fund
  after deducting all related and permissible expenses. The NAV is calculated at the end of
  every business day. It is the value at which an investor enters or exits the mutual fund.
- Benchmark: A group of securities, usually a market index, whose performance is used as
  a standard or benchmark to measure investment performance of mutual funds. Some
  typical benchmarks include the NIFTY, Sensex, BSE200, NSE500, Crisil Liquid Fund Index
  and 10-Year Gsec.
- Entry Load: A mutual fund may have a sales charge or load at the time of entry and/or
  exit to compensate the distributor/agent. Entry load is charged when an investor
  purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the
  time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the
  investor will enter the fund at Rs. 101.
  - (Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor).
- Exit Load: Exit load is charged when an investor redeems the units of a mutual fund. The
  exit load is reduced from the prevailing NAV at the time of redemption. The investor will
  receive redemption proceeds at net value of NAV less Exit Load. For instance, if the NAV
  is Rs. 100 and the exit load is 1%, the investor will receive Rs. 99.

- Yield to Maturity (YTM): The Yield to Maturity or the YTM is the rate of return when a
  bond is held until maturity. YTM is expressed as an annual rate. The YTM factors in the
  bond's current market price, par value, coupon interest rate and time to maturity.
- Modified Duration Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.
- Standard Deviation: Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.
- Sharpe Ratio: The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.
- Beta Ratio (Portfolio Beta): Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.
- AUM: AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.
- Holdings: The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.
- Nature of Scheme: The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is termed an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have subcategories.
- Rating Profile: Mutual funds invest in securities after evaluating their
  creditworthiness as disclosed by the ratings. A depiction of the mutual fund in
  various investments based on their ratings becomes the rating profile of the fund.
   Typically, this is a feature of debt funds.

## **Market Insights**

December 29, 2023

#### Dear Investors & Partners,

The month of December 2023 was quite eventful with regard to the impact on equity markets in general.

Election verdict: Expected political continuity should boost investor confidence. BJP's recent win in the 3 state elections of MP, Rajasthan and Chhattisgarh is much better than the market expectations and further reinforces the consensus expectations of a Current Government win 2024 national elections with a greater likelihood of 300+seats for the BJP.

Fed policy: The FOMC in it's latest meeting signalled the end of rate hikes. The historic tightening of monetary policy is likely over as inflation fell faster than expected and with a discussion of cuts in borrowing costs coming in CY24.

RBI policy: The RBI MPC voted unanimously to hold the repo rate at 6.5%. The MPC revised its real GDP growth projection to 7% (earlier: 6.5%).

The month of December 2023 saw significant gains in large-cap stocks fuelling the rally alongside mid-caps, while small caps took a breather. Sustained trend of profit growth, capital expenditures, and stable liquidity were key themes during the month. FIIs bought net equities worth Rs 66,135 crores in December 2023, with DIIs logging in net purchase of 12,942 crore.

The large cap bellwether indices S&P BSE Sensex and Nifty 50 (TRI) climbed 7.8% and 7.9% respectively in December 2023. S&P BSE MidCap and S&P BSE SmallCap rose 7.5% and 5.7% respectively. Year-on-year basis, S&P BSE Sensex and Nifty 50 surged 18.7% and 20.0% respectively while S&P BSE MidCap and S&P BSE SmallCap soared 45.5% and 47.5% respectively.

On the S&P BSE sectorial front, the leading performers in December 2023 were S&P BSE Power (18.2%), S&P BSE PSU (15.3%) and S&P Oil & Gas (12.0%).

**Nifty hits record high, ends CY23 with 20% returns:** In CY23, the Nifty recorded an impressive 20% YoY gain. Despite weak global macros, rising interest rates, and geopolitical uncertainties, Indian equity markets remained resilient, clocking eight consecutive years of positive returns!

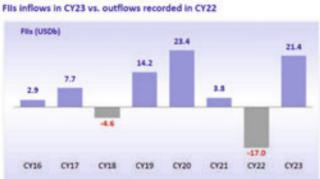

Over the last 5 years period as well, mid caps and small caps have outperformed the large caps by a significant margin.

Past performance may or may not be sustained in future and is not a guarantee of any future returns. Index performance does not signify scheme performance

• Strong FIIs/DIIs inflows: FII inflows into Indian equities stood at USD21.4bn in CY23 vs. outflows of USD17bn in CY22. During the last eight years, FIIs have invested USD51.8bn cumulatively in the Indian market, with only two years of outflows. DII inflows into equities in CY23 remained strong at USD22.3bn vs. USD32.2bn in CY22. With just one year of outflows since CY16, DIIs have invested USD102.8b cumulatively over the last eight years.

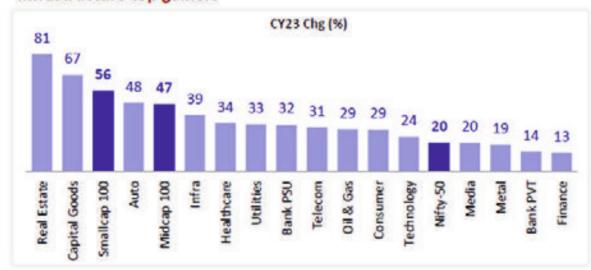

(Source: Motilal Oswal)

• All sectors delivered positive returns in CY23: Among the sectors, the top gainers were Real Estate (+81%), Capital Goods (+67%), Automobiles (+48%), Infrastructure (+39%), and Healthcare (+34%).

(Source: Motilal Oswal)

#### Our Investment Framework - SQL

Based on our combined investment learnings of more than 50 years, we have institutionalized very strong investment Framework -SQL, which is core to our fund management framework and approach to our portfolios. We strongly believe that good quality (Q), low leverage companies (L) bought with a reasonable good margin of safety (S) makes the investment very attractive and rewarding for our investors.

| Investment Framework | Equity                  | Fixed Income            |
|----------------------|-------------------------|-------------------------|
| S                    | Margin of Safety        | Safety                  |
| Q                    | Quality of the Business | Quality of the Business |
| L                    | Low Leverage            | Liquidity               |

#### **Our Risk Management Framework**

Our Risk Management Framework & our Investment Framework are well thought-out and institutionalised to generate superior investment performance and creating a smooth investment experience for all our investors. They are framed based on our own investment experience and also imbibed learnings from some of the great investment houses and investment managers globally, which will stand the test of time and keep our investors interest at high standards. We have put risk limits based on fund mandates, market cap segments, sectors and stocks.

#### How are we positioned in our funds?

With macro situation being very dynamic and volatility increasing across asset classes, we continue with our strategy of running well-diversified portfolios. We are more focused on stock selection process within the sector rather than trying to take large overweight / underweight position among sectors. We would also refrain from taking aggressive cash calls. While the focus continues to be on stock selection on a bottom-up basis we would gradually tilt the portfolios towards large cap scrips compared to their midcap/small cap counter parts.

#### Top 2 overweight sectors in our equity schemes are as under:

- ITI Multicap fund: Capital goods, Consumer Services
- ITI ELSS Tax saver: Capital Goods, Consumer Services
- ITI Small cap fund: Capital goods, textiles
- ITI Large cap fund: Construction, Construction material
- ITI Mid cap fund: Capital goods, Construction
- ITI Value fund: Power, Consumer durables
- ITI Flexicap fund: Capital goods, Textiles
- ITI Focussed Equity: Capital goods, Autos

#### What should be your approach while investing into our Mutual Fund Schemes?

We expect the volatility to continue over the next few months as the market-outlook is likely to remain challenging. Valuations remain marginally above long-term averages. On the back of lower commodity prices especially crude oil and with operating leverage, earnings would rise for corporates and rupee denominated trade could lead to a strong performance by the Indian economy in Cy24.

Investors wanting to invest in lumpsum can invest in ITI Balanced Advantage Fund, Value Fund and ELSS Tax Saver Fund. Investment in equity funds, particularly mid and small cap categories, should be done systematically over the next three to four months in the form of daily / weekly STPs or SIPs. While the current rally shows little signs of slowing down, retail investors must continue investing in well-managed funds via SIPs.

#### **Equity Market Outlook**

#### Long-term outlook remains intact:

Going forward while all eyes are on the General Elections, all the three elements of the capex cycle (Housing, Corporate Capex & Govt Capex) are now firing and hence the potential global slowdown should have limited impact on India. A combination of a strong pent-up demand for housing, above average affordability and 12-year low unsold inventory should drive a multi-year virtuous housing cycle. Ditto for corporate capex with all time low D/E ratio for Indian corporate, along with a decade high capacity utilisation level and well capitalised banking system should drive corporate capex. Govt Capex could slowdown but private capex pick-up should more than offset.

Unlike every year, the budget would be a Vote on Account in this financial year. However, considering election year, one cannot rule out a populist measures being announced in the budget. During 2019-20, the first interim budget of the incumbent government saw various measures being implemented like PM Kisan Yojana – transferring Rs.6000 per annum x  $^{\sim}12$  crore farmers entailing an outlay of Rs.75,000 crore per annum. These sort of measures are expected to not only provide spending impetus at the lower strata of the society but is also expected to reinforce the positioning of the incumbent Government with a strong majority.

#### **Debt Market Outlook**

- The US Fed expectedly held the benchmark rate in the 5.25% 5.5% target range in the FOMC meeting in December 2023, and importantly projected 75 bps (100 bps = 1.0%) of rate cuts in 2024. Furthermore, though the Fed decided to continue with the pace of quantitative tightening (QT), the FOMC minutes indicated discussions on when to flag the balance sheet change.
- Markets have welcomed the "Fed pivot" and the 10-year US Treasury bonds closed largely
  unchanged for 2023. The nearly 1.0% fall from the 2023 peak in the last 2 months of the year seems
  to have left less room of error and puts the market at significant odds from the Fed's policy rate
  forecast trajectory.
- The RBI expectedly kept the repo rate as well as the policy stance unchanged at the December 2023

MPC meeting. The tone of the MPC was balanced with the focus on the need to sustain the disinflation path to ensure a durable alignment of CPI to the 4.0% inflation target being partly offset by cautioning the risk of overtightening, especially when large structural changes, geopolitical and geoeconomic shifts are taking place.

- Since November 2023 we have increased duration across portfolios as global environment became
  less hostile and anticipated the Fed to acknowledge the same. We moderately further added
  duration in December 2023 and expect our portfolios to maintain higher maturity over the coming
  months as compared to the past year.
- Prospects of a Fed rate cut in 1H CY2024, expected policy continuity at the Centre post the India's
  State elections results and potential inflows from India's inclusion in the global EM bond index
  remain tailwinds for Indian bonds. We expect any sharp increase in yields (not a base case) to be
  bought into and expect rates to trade lower into FY2025. Long maturity bonds are expected to find
  favour with long term investors over the coming months and we see some merit in taking advantage
  of this seasonality.
- Global policy rates are at peak levels or near peak levels and policy rates are expected to end lower by end-2024. The current environment seems suitable for duration products such as Dynamic Bond funds and Banking & PSU Debt funds which are well positioned to take advantage of a falling interest rate cycle and can deliver superior risk adjusted returns as compared to non-market linked fixed rate products.

## India Market Outlook and Road Map 2024

#### **Developments of Year 2023 Gone By:**

The developments of the year 2023 reflect a dynamic and eventful economic landscape. Here's a breakdown of the key highlights:

Global Focus on Inflation Control: Central banks worldwide placed significant emphasis on controlling inflation in 2023.

Success in Inflation Management: Thanks to the concerted efforts of central banks, there are signs that inflation is receding.

Positive Global Equities Performance: The calendar year 2023 brought positive momentum to global equities, with many markets delivering reasonable returns.

Nasdaq's V-Shaped Recovery: Nasdaq, known for its technology-focused listings, showcased a V-shaped recovery. This rapid rebound is a testament to the resilience and strength of the technology sector in the face of economic challenges.

Chinese Economic Struggles: While global markets flourished, the Chinese economy faced challenges with a slower recovery.

Indian Equity Market Volatility and Recovery: The Indian equity markets witnessed interim volatility during the first half of 2023. However, the second half saw a rebound, delivering reasonable returns. The resilience displayed by the Indian market indicates adaptability to changing economic conditions.

Robust Total FPI Flows to India: India experienced robust Total Foreign Portfolio Investment (FPI) flows throughout the year. This influx of foreign investment signals confidence in India's economic prospects and investment opportunities.

India's Continued Growth: Despite challenges, India maintained its position as the 5th largest economy by GDP. The country continued to be one of the fastest-growing economies globally, highlighting its economic resilience and potential.

#### Pillars of Strength in Indian economic landscape

Each point highlights a key aspect of the economic environment, showcasing a promising and well-managed scenario.

Robust Auto Sales: Sustained demand and positive consumer sentiment led to a notable increase in month-on-month auto sales, surpassing figures from 2021 and 2022.

High Credit Growth: A substantial credit growth of 15.5% in November 2023, the highest since 2014-15, indicates increased economic activity and confidence in borrowing and lending.

Youth-Driven Consumption: The young and earning demographic is poised to drive consumption growth, fostering demand across various sectors and contributing to economic expansion.

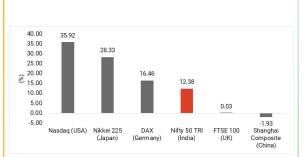

Changing Spending Patterns: The faster growth in high-income and upper-middle-income groups signals a shift in spending patterns, offering new opportunities and challenges for businesses catering to these segments.

Infrastructure Development: The commitment to constructing 13,800 km of highways in the fiscal year 2023-24 reflects a focus on infrastructure development, crucial for overall economic growth.

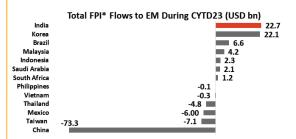

Logistics Cost Reduction: Efforts to reduce logistics costs from approximately 14% to around 10% demonstrate a commitment to enhancing efficiency and competitiveness in business operations.

Higher Public Capex Impact: Increased public capital expenditure has fuelled higher economic growth by supporting core sectors, showcasing a proactive economic strategy.

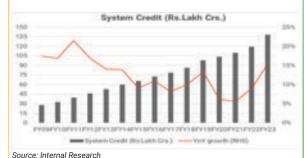

Controlled Fiscal Deficit and Inflation: Effective management and policies have kept both fiscal deficit and inflation in check, ensuring stability and mitigating potential risks.

# India Market Outlook and Road Map 2024

#### Way Forward - 2024

#### Indian G-Sec Inclusion in JP Morgan's Index:

This move could enhance the reasonability of Indian bonds for global investors.

#### **US Fed's Approach to Rate Hikes:**

The U.S. Federal Reserve's decision to hold back on rate hikes indicates a cautious approach to monetary policy.

#### **Robust Consumption Fuelled by Credit Growth:**

The combination of robust consumption and credit growth suggests a positive outlook for economic activity.

#### **Buoyant Auto Sales:**

The expectation of buoyant auto sales points to sustained demand in the automotive sector.

#### **Pickup in Private Capex:**

The anticipated pickup in private capital expenditure (capex) signifies growing confidence among businesses.

#### **Policy Repo Rate Expectation:**

The projection that the policy reporate is expected to end 2024 in the range of 5.75% to 6.0% indicates a potential path for monetary policy.

#### **Valuations**

#### Valuations:

The 1-year forward P/E ratio for Nifty (Large Cap) is trading below the 10-year average. The 1-year forward P/E for Nifty Mid Cap and Small Cap is above the 10-year average. This implies that mid-cap and small-cap stocks may be relatively more expensive compared to their historical average. Investors may be pricing in expectations for significant growth in this segment.

#### **Equity Outlook**

**Growth-Inflation Dynamics:** A balanced interplay between economic growth and controlled inflation is deemed supportive of equity markets, fostering a favourable environment for corporate profitability and stock market performance.

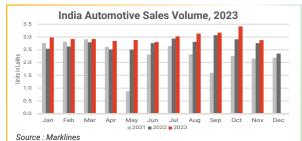

**Growth-Focused Fiscal Policy:** The emphasis on a growth-focused fiscal policy signals government initiatives aimed at stimulating economic expansion.

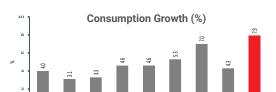

**Improving Real Income Levels:** Expectations of improving real income levels are seen as positive for consumers, potentially leading to increased consumer spending—a key driver of economic growth.

**Broadening Growth Momentum:** The indication of broadening growth momentum suggests that economic expansion is not limited to specific sectors but is spreading across various segments, contributing to overall market strength.

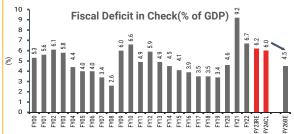

**Support for Corporate Profitability:** A positive economic environment, characterized by growth-focused policies and improving real incomes, is expected to support corporate profitability—a crucial factor for driving equity market returns.

**Investment Recommendation for Retail Investors:** The recommendation for retail investors to continue investing in well-managed funds through SIPs or STPs encourages a long-term and disciplined investment approach, taking advantage of market fluctuations.

# India Market Outlook and Road Map 2024

#### **Fixed Income Outlook**

#### **Interest Rates:**

We continue to anticipate the Central Bank to have a small window to cut the policy repo rate in April 2024. Additionally, we expect the policy repo rate to end 2024 around 5.75% - 6.0% range.

#### **Duration:**

We increased duration across portfolios as global environment became less hostile over the past month.

#### Liquidity:

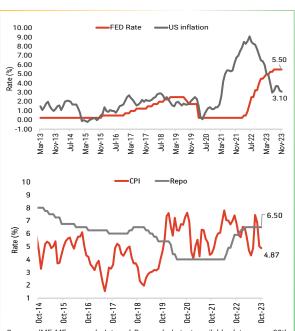

The RBI's focus remains on withdrawal of excess liquidity. After remaining in surplus throughout H1 2023, the banking system liquidity has remained in a deficit since Oct'23.

#### Yields:

We expect bonds to trade in a narrow range in the near term with a softening bias.

#### **Fund Strategy:**

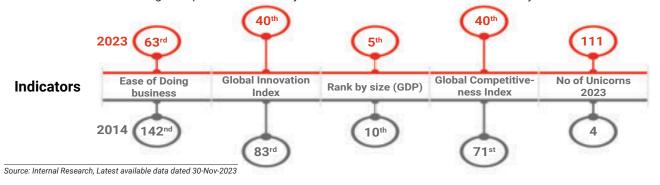

Given that policy rates are at peak levels and are likely headed lower (bar any geopolitical flareup) over the coming quarters, actively managed funds with higher duration can be suitable.

Source: JMF MF research, Internal Research, Latest available data as on 30th Nov'23. Past performance may or may not be sustained in future and is not a guarantee of any future returns and should not be used as a basis of comparison with other investments.

#### India has been witnessing perks of sound governance

India has achieved **rapid growth and global recognition** under Current Government Regime. India's improved international standing has had a direct relation to Rupee's acceptance globally. Current Government Regime's past two terms may be called as **"Amritkaal"** of Indian economy.

#### **Risks to Our Outlook**

#### **Hard Landing of US Economy**

Unfavourable Monsoon season still has higher impact on the agricultural output, highest contributor of GDP in India.

**Geopolitical Tension – Escalation of Israel war** and involvement of the Middle East remains a threat which if materialized could threaten the global trade.

High Global inflation leads to a chain reaction of lower demand-higher cost of production prospective losses & unemployment.

Commodity Prices - Hardening of commodity prices due to Chinese growth come back may be detrimental.

## **Market Review**

December 29, 2023

#### **Debt Market Update**

- The US Fed expectedly held the benchmark rate in the 5.25% 5.5% target range in the FOMC meeting in December 2023, and importantly projected 75 bps (100 bps = 1.0%) of rate cuts in 2024. Furthermore, though the Fed decided to continue with the pace of quantitative tightening (QT), the FOMC minutes indicated discussions on when to flag the balance sheet change.
- Markets have welcomed the "Fed pivot" and the 10-year US
   Treasury bonds closed largely unchanged for 2023. The nearly 1.0%
   fall from the 2023 peak in the last 2 months of the year seems to
   have left less room of error and puts the market at significant odds
   from the Fed's policy rate forecast trajectory.
- The RBI expectedly kept the repo rate as well as the policy stance unchanged at the December 2023 MPC meeting. The tone of the MPC was balanced with the focus on the need to sustain the disinflation path to ensure a durable alignment of CPI to the 4.0% inflation target being partly offset by cautioning the risk of overtightening, especially when large structural changes,

Data as of December 2023, Source: Bloomberg

Electronic Goods

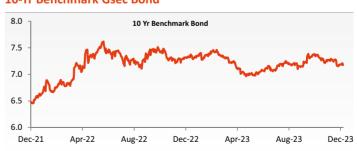

- geopolitical and geoeconomic shifts are taking place.
- Since November 2023 we have increased duration across portfolios as global environment became less hostile and anticipated the Fed to acknowledge the same. We moderately further added duration in December 2023 and expect our portfolios to maintain higher maturity over the coming months as compared to the past year.
- Prospects of a Fed rate cut in 1H CY2024, expected policy continuity at the Centre post the India's State elections results and potential inflows from India's inclusion in the global EM bond index remain tailwinds for Indian bonds. We expect any sharp increase in yields (not a base case) to be bought into and expect rates to trade lower into FY2025. Long maturity bonds are expected to find favour with long term investors over the coming months and we see some merit in taking advantage of this seasonality.
- Global policy rates are at peak levels or near peak levels and policy rates are expected to end lower by end-2024. The current environment seems suitable for duration products such as Dynamic Bond funds and Banking & PSU Debt funds which are well positioned to take advantage of a falling interest rate cycle and can deliver superior risk adjusted returns as compared to non-market linked fixed rate products.

#### Disclaimer - Fund SIP Performance

The performance details provided herein are of Growth option under Direct and Regular Plans. The Fund(s) offer Systematic Investment Plan (SIP) facility. To illustrate the advantages of SIP investments, this is how your investments would have grown if you had invested say Rs. 10,000 systematically on the first Business Day of every month over a period of time in the Growth Option of respective scheme. The returns are calculated by XIRR approach assuming investment of 10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with correct allowance for the time impact of the transactions.
